

# Solar Air Conditioner Systems

The energy used on Earth is getting scarcer and the prices of oil are rising. Almost all the world has come to realize that energy is precious. How to develop high efficiency and low pollution alternative energy has become a very important issue. Taiwan has a long period of sunshine over the year and air-conditioning has become an indispensable asset. In the past, air-conditioners used electricity from power plants. Solar energy could be used to reduce environmental pollution and reduce carbon emissions
